Professional Summary

Results-driven Software Engineering student with a strong foundation in C/C++, Java, Python, Data Structures, and OS concepts, alongside proven full-stack experience across React, Node.js, and MongoDB. Experienced in leveraging AI-assisted development tools (ChatGPT, Claude, Cursor, Copilot) to accelerate delivery. Delivered a 30% database performance improvement through query optimization and built secure applications with OAuth/JWT. Strong analytical and problem-solving abilities with 70+ algorithmic problems solved on LeetCode. Eager to learn and apply AI/LLM technologies.

Education

Bannari Amman Institute of Technology

B.Tech – Information Technology

Jul 2024 – Present

CGPA: 6.53 (Till 6th Semester)

PSG Polytechnic College

Diploma – Information Technology

Aug 2022 – May 2024

Percentage: 83.65%

Technical Skills

Programming Languages: Java, Python, C++, JavaScript, TypeScript, PureScript (Learning)

Core Concepts: Data Structures, Algorithms, OOPS, OS Concepts

Frontend: React.js, React Hooks, HTML5, CSS3, Responsive Design, Figma

Backend & APIs: Node.js, Express.js, Spring Boot, Spring MVC, RESTful API Design, GraphQL, OAuth/JWT

Networking & OS: Linux, TCP/IP, UDP, Routing, Security

Databases: MongoDB, MySQL, Redis, PostgreSQL (Learning)

Tools & Cloud: Git, GitHub, Docker, Kubernetes, Postman, AWS, Google Cloud

Projects

SkyCam Photography Platform | *React.js, HTML5, CSS3* | [GitHub](#)

Ongoing

- Developing a highly responsive and visually immersive photography portfolio designed to deliver exceptional user engagement across devices.
- Achieved a 90+ Lighthouse performance score by implementing rigorous SEO optimization, semantic HTML, and advanced image lazy-loading.
- Leveraged React Hooks and component-based architecture to design extensible, modular UI components tailored for seamless integration with future backend APIs.

Knowledge Sharing Portal | *React.js, Node.js, MongoDB* | [GitHub](#)

Completed

- Optimized MongoDB schemas and database queries through strategic indexing, successfully reducing data retrieval latency by 30%.
- Developed a scalable full-stack content publishing platform, engineering optimized RESTful APIs to support high concurrent user traffic.
- Implemented secure authentication and authorization workflows utilizing OAuth 2.0 and JWT for strict role-based access enforcement.

Automated Student Evaluation Hub | *React.js, Node.js, MongoDB* | [GitHub](#)

Completed

- Engineered a scalable full-stack evaluation engine featuring automated code execution environments and advanced plagiarism detection algorithms.
- Implemented robust role-based access control (RBAC), real-time analytics dashboards, and automated PDF report generation.
- Architected a high-performance backend utilizing Node.js and MongoDB to seamlessly process and grade 20+ concurrent student submissions.

Certifications

- NDG Linux Unhatched — Cisco Networking Academy
- CCNA Coursework & Intro to Cybersecurity — Cisco Networking Academy
- Data Structures & Algorithms — Solved 70+ problems on LeetCode
